WHAT IS NURSE MATES ALIGN™?

Nurse Mates Align™ Technology is an innovative ergonomically designed orthotic that helps place the foot in a more optimum position to assist with proper alignment, stability and support.

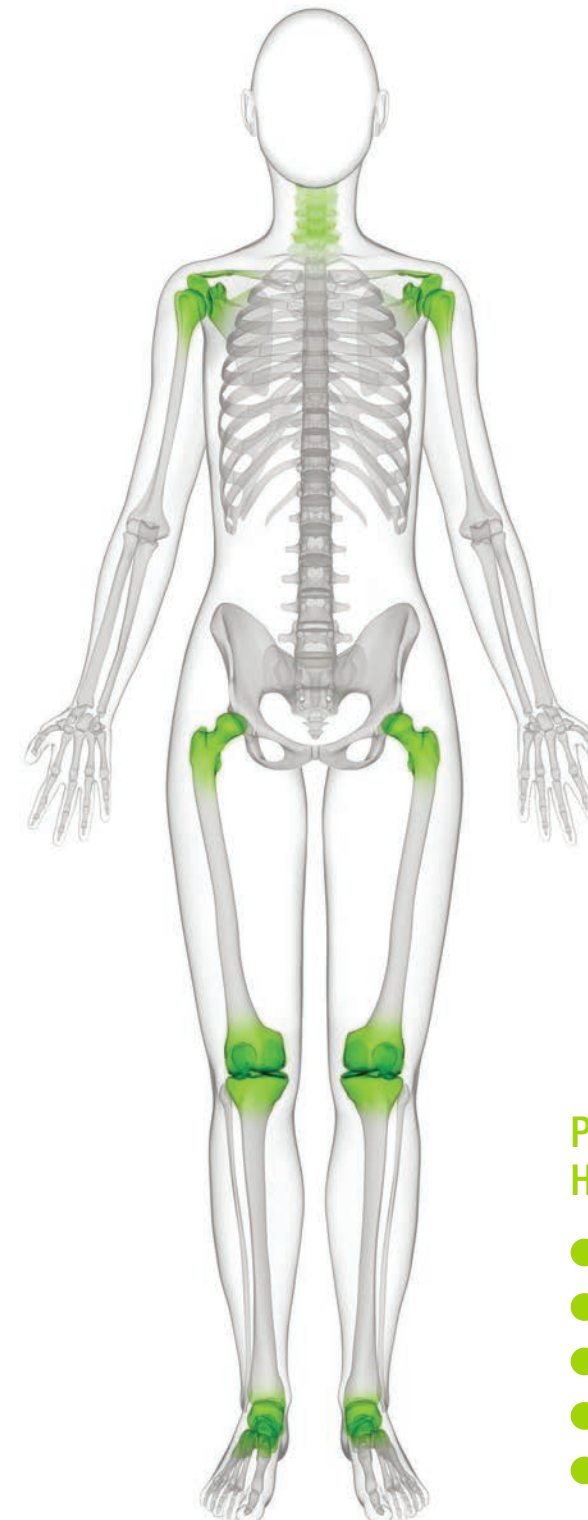

Built into every Align™ style, this firm yet flexible orthotic gently stabilizes and supports the arch and heel from the ground up, assisting with the proper alignment of the foot to reduce pressure on tendons and joints.

*“These shoes have helped **ALLEVIATE THE PAIN** in my heel. I plan on buying these again and again” - Sharon, VA*

FEEL THE COMFORT

Your feet play a vital role in your overall health and wellbeing. The position of your foot as you walk and stand every day can directly impact several other areas of the body, and that's why the stability that comes from proper alignment is so important.

DR. DOROTHY H. KURTZ PHELAN, D.P.M.
Podiatric Physician and Surgeon

“I was thrilled when Nurse Mates approached me to be a part of the research and development of ALIGN™. Throughout my years of practice in podiatry, I've seen firsthand the struggles that my patients experience with heel and foot pain. I'm an advocate for proper foot alignment because it can benefit not only foot health, but overall health as well.

I highly recommend Nurse Mates ALIGN™ footwear for anyone who is concerned with comfort, stability and support, especially those that work on their feet and are on the go throughout the day.”

PROPER FOOT POSITIONING CAN HELP REDUCE THE FOLLOWING:

- Ankle & arch instability
- Knee & hip pain
- Posture & back problems
- Neck & shoulder strain
- Muscle & joint fatigue

BREAK IN PERIOD

The firm, built in Align™ orthotic most often requires a break in period, especially for those with fallen arches or other foot problems. We recommend wearing Align™ for only a few hours each day, and gradually working up to all day wear. Once you are comfortable for a full day, you won't want to live without them!

FENTON

Sizes: M 6-10, 11; W (Black and White only) 6-10, 11

Slip-Resistant Ratings

Slip-Resistant Testing is performed on unglazed quarry and standard vinyl tile in accordance with ASTM F 1167, using Mark II equipment. Results are based on a scale where 0.0 is the absence of friction and 1.0 is high friction.

Industry Standard for Slip-Resistance is 0.5
